Following the initial meeting, working as a group, students developed a design brief and a production calendar for the project. Students collaborated with an off-campus client, the Office of Ethics Integration at Ascension St. Vincent on the development of an Ethics Journal.

Collaboration: Ethos Ethics Journal

Students developed design solutions with clients from Ascension/St. Vincent, Marian University’s Writing Center, and Computer Science students. Through practicing a co-design process, students learn to become professional level practitioners, build knowledge and skill with tools and processes in the completion of print products. Professionally present creative concepts through oral and visual written forms in class critiques and client presentations.

Ethos - The Grateful Dead

Students developed design solutions with clients from Ascension/St. Vincent, Marian University’s Writing Center, and Computer Science students. Through practicing a co-design process, students learn to become professional level practitioners, build knowledge and skill with tools and processes in the completion of print products. Professionally present creative concepts through oral and visual written forms in class critiques and client presentations.
