President Outlines Projects

Well, it's happened again! Here I am, a graduate student, writing this column for our Student Association. Three weeks ago this thought frankly terrified me! I thought of "talking publically" and a shiver and to the pere, but I abandoned that idea for fear of being called in by Miss Popplesworth to the Student Appraiser again. So, I guess we're both stuck, but after three years of feeling a bit nervous about the subject, I hope the favorable response you've given me thus far is a sufficient indication that you enjoy it.

Our first meeting, the fabulous response to our Viet Nam Coffee Hour, and the receiving of our Welfare symptoms have all given me confidence that we can and will achieve something with this second semester. Some of these plans have been made already, but you can look for in the near future are the completion of our Board Office located on the ground floor of the Administration Building; our annual money project, which presents an opportunity to discuss the continuing selection of a Board Student Social Committees comprised of the class officers, under the chairmanship of the Board President, and an effort to further facilitate our social functions, whereby the board is left open to meet student needs in other realms in the future.

Action Is The Answer

The young adults of the 1960's have been one of their most prominent characteristics a vital and deep concern with the functions of both governmental and local affairs. This is undeniable when one takes a look at the student demonstrations, debates, heated discussions, and their activities. There is a whole generation of people in countless efforts to shape the world so that it will fit into their particular mold.

Although there is no question as to the commendability of these attitudes, this writer feels that we are in danger of spurning an overabundance of committees and discussion groups in which all of our zealous and crusading agencies will be exhausted in the administrative details and the fact-finding phase of the phenomenon of course this will leave us a very small amount of time for constructive, real ACTION.

This is not to be misconstrued as a maintenance that knowledge of the facts is unnecessary, but rather as a plea for an end to the repetition of the same worn pieces of information concerning a problem. When this has been done each organization will then be better able to pursue its actual goals. So be to publicize the facts the group has in its possession, to aid a needy individual, to promote understanding among certain groups, very many of a number of other purposes, for which the reader and the people who can talkers and/or thinkers, but doers as well and this is the reputation that we who are the 1960's should strive to make our R. B.

Film Critic Unvoices

by Bill Willmont

Edward Fischer, film critic and author, began his yearly review of film with a day-long workshop on film evaluation.

The first requirement of judging film, Mr. Fischer declared, is the ability to understand the technique of the filmmaker. Films are not the same as dramas, television or the other performing arts. Film-making is a different craft with different rules and policies governing on visual communication.

Two morning lectures reviewed Professor Fischer's techniques of visual communication, a whole of film techniques as camera angle and placement, composition, lighting, and editing.

Participants in the workshop were able to judge all of these and committed to the visual communication of films in the afternoon screening of Victoria de Sica's film, "The Little Prince," a comic film.

A social studies of the Italian neo-realist style, "Miracle of Milan," many sub- tle techniques of visual communication, Professor Fischer pointed out in his analysis following the screening.

In his analysis Professor Fischer noted that besides the unique experience of visual communication, the film-making art enables the viewer to see beyond his own life. It takes a look at the student demonstra- tion of a Student Board Social Committee comprised of the class officers, under the chairmanship of the Board President, and an effort to further facilitate our social functions, whereby the board is left open to meet student needs in other realms in the future.

Honor's Project Studies Ester Hydrolysis Speed

Frances Walker, chemistry major for the Honors Program, is nearing the completion of her Honors Project: "A Study of the kinetics of ester hydrolysis (i.e. whether anyone had studied this technique in studying the kinetics of other reactions). I decided to study the gas chromatographic determination of the rate of hydrolysis of a specific ester, isopropyl acetate."

A full year of experimenting, first with the chromatograph itself and then with the actual separation of esters into their component acids and alcohols, led to meaningful readings on an automatic recorder.

To determine the relative merits of her techniques, she added a comparative study using other processes which have been employed.

Frances came to Marian as a graduate of Southwestern High School in Indiana. Catholic High School was her class valedictorian, an officer of the National Honor Society, and a member of Beta Theta chapter of Alpha Kappa Mu. As a junior, she had also attended Ohio State University on a summer grant from the National Science Foundation.

Her Marian record is indicated in an Who's Who article, page 17, and the Dean's List story on this page.

Alumna Finishes Cancer Study

Mrs. Helen Perry, a June 1965 graduate of the medical technology course, has just completed technical training in the diagnosis of cancer at Indiana University Medical Center and will return to St. Vincent's Hospital in early May.

Mrs. Perry, the former Miss Helen Wisdom, is a 1941 graduate of St. Vincent's Hospital School of Nursing. She was the recipient upon graduation of a Kappa Kappa Gamma College presented by Alpha Mu Omega Chapter of Alpha Kappa Mu.

A holder of a B.S. degree, Mrs. Perry was working as a medical technologist at St. Vincent's hospital when she received a six-month grant for further study at I.U. Medical Center.
