Players' Issue Probed

"The aim of Marian College, then, is to produce graduates who have mature, inquiring, and honest minds, well-integrated personalities, healthy bodies, well-defined goals, high moral standards, sound ethical tastes, and a sharp sense of personal and social responsibility." (Marian College Catalogue, pp. 10)

The underscoring in the above quote was added by the editor. A "well-integrated personality" is a rather difficult term to define. We won't attempt to do so, we do feel, however, that this term implies in an academic community a certain amount of understanding of different esthetic values among students and teachers.

On page four of the Phoenix, readers may note how the "Behind the Plate" interview with Coach John Harkin concerning the Freshman basketball team, briefly the Phoebus, was cut out of the paper. The resident students who are living in residence hall as roommates, Coach Harkin makes points in favor of this type of segregation which we can appreciate. We are glad, though, that this move is termed "Experimental" because we are certain that it must be evaluated thoroughly at the end of this academic year and probably at the end of this semester.

We object to this type of isolation for only one reason. We feel as how a person can get a liberal education if he is not exposed to the different ideas of his fellow students among the athletes as by now a new method of teaching the same thing. It rather reminds one of a concept of segregation which should have gone out with the Middle Ages, but hadn't.

What about the effect on the college as a whole? Generally (and there are always exceptions) Jerry Lucas, who played on the Ohio State team, his name had only to be mentioned in connection with sports and...there was interjected a barbed defense, "He is also a straight-A student." We think this indicates the potential gulf between the scholarship and athletic staffs at Marian.

We feel this case of isolation at Marian is not conductive for a liberal education; we hope we are proved wrong.

Five "W"s

Want Peaceful Revolution

Revolution appears to be the essence of progress on many campuses today, and the results which are most publicized are those involving violence. With the great changes sought through revolutionary means, we can expect some extreme methods, but it has been proven at Marian that change can be achieved through more peaceful means.

We at Marian have seen the need for change and we have been able to do something about this need without having to stage a coup d'etat in Dr. Guzzetta's office. The successes we have accomplished have been made more feasible with participation and understanding augmented by the cooperation of our student government with the administration. We have voiced our opinions and ideas through out student government, and the administration has listened. We have not achieved all that we have wanted, but our victories have given us greater confidence in ourselves and in our friendly relationship with our faculty. We can appreciate the importance of this as responsible, thinking adults.

It is traditional for the president of a college to be approached with the dilemma of allowing student interest groups to express themselves and, at the same time, having to maintain limitations on the amount of freedom granted. It is necessary for students to realize that it is necessary for them to maintain integrity. However, difficulties arise when there is a discrepancy between the freedom and the integrity. Hopefully, this problem can be solved without major disturbances, but when administrators are afraid of the students, this is not conceivable. We have been given opportunities to choose for ourselves with active participation in our student government, and we can realize that this is not only by our authority, but the administration.

This has been a peaceful and, we believe, a responsible one. We have asked for freedom and we have utilized it and will continue to do so throughout our lives.

If revolution is needed to maintain the pace of progress, so be it, if it can be achieved with integrity and cooperation to give our support.

The Hoh Thing

By Michael Hohl

Demands being in style, I thought I might start this, my first column this year, in a more individualistic vein--my way.

No, not bad word, perhaps--better--an explanation of the whole thing. Basically, I want to write about love in a (sometimes philosophical manner) about love and life in the college. Can be called "The Hoh Thing" would be except for some hang-ups with bishops, birth control and censorship, etc. (Continued on page 4)
Enrollment Shows
Slight Increase
By Eileen Fleetwood

The final figures on the first semester enrollment have been compiled and indicate an increase over last semester. Total students (part-time- evening division) number 7,041. This figure is particularly significant not only because it indicates an increase, but because certain trends, previously enumerated in last year's figures (7,060) are no longer included.

Since St. Vincent's Hospital has phased out its nursing program there are no longer student nurses enrolled at Marian. There has also been a decrease in the number of prospective sisters enrolled at Oldenburg. Despite this encouraging enrollment is actually 50 students greater this semester. (It is interesting to note that the birth rate of 1950 was also slightly higher than in the previous year.)

With an increased student population there has been a possibility to nearly fill the men's residence and the women's residence completely filling all the vacancies left by the seniors moving to new quarters.

Referring to optimum site, the division of residence for future enrollment includes a student population not to exceed 1.200 per residence population, including evening division to reach 5,000 by the mid '70's.

The balance of students is 407 girls and 1,004 boys (6 student figures). Senior women can rejoice, for senior student figures). Senior women have completely increased over last year's figures. (It is interesting to note that the birth rate of 1950 was also slightly higher than in the previous year.)

The apparent present success of the Czechs' dissolution and the failure, although the present and the projected effect on the methods of dissent. The Czechs have shown in their sudden and forceful action and force did have some success. However, in the U.S. this method of outward demonstration seems to have lost one of its impact values. It would seem that while the Czechs are coming out of their period of underground dissidence, the movements of the United States perhaps are about to enter such a stage in hopes for more depth of success.

Bits And Pieces
Of A Frosh Dream
By Thomas Finley

As a member of the long-suffering freshman class, I would like to direct this questionnaire to the literate sophomores. I feel that these short and concise queries will help separate the eggs from the spaghetti.

How many of you have had the humbling experience of being caught in the shower without your boomerangs and mango tags on?

Word had been getting around that Vince Danno has become addicted to brushing his teeth with chocolate milk. The sophomores got him into the habit. He says it really mixes well with Ultraslide toothpaste.

Everybody seems to know the Barron. has anybody heard about what he did to his own sister?

Why is it that the sophomores decorated the pictures of our mothers? Has anybody seen a picture of Fossed Welch in a pink bikini?

Was the guy running around with meatloaf shaving cream?

About the Beatle Bouncer-"All-Who is Trots-Kay? Who taught Kevin Rodgers how to throw a scream pie?

The sophomore girls, maybe?

Why was the rooster upstairs and the dry cleaning bill was on Ken Alderson's $800 spaghetti suit? It's too bad the soph class doesn't have an "all in fun" fund.

We have a lot more to ask, but rather than have the sophs reported to the A.S.P.C.A., we'll keep quiet—besides, we can put all this to work next year.

"Reform!" is the motto of today's Negro, and Marian will be a part of this progressive movement. URI, the Union for Black Identity, is a new organization on campus which aims to fully realize the needs of black students, which will attempt to fill these needs through positive means of black influence. The necessity of communication between the black and the white students is also an integral part of the activities and ideals of URI.

The central issue in the gap between white and black students appears to be one difference in environment and ideas. Thus, when the members of URI have experienced these difficulties, and have organized in order to examine these problems and take positive action in solving them, the act of opening an atmosphere of openness and discussion of their situation will be a result of this movement of change.

As an instrument of identity, URI hopes to be an impetus for prospective black students as well as the black students on campus to express themselves and take part in the reform. URI does not only involve the black student, but of the black people as a whole. In addition, URI hopes to introduce Marian to the forms in which the black people have expressed themselves culturally by presenting their art, literature, music, and ideas. Considered thought in various programs, URI is also an opportunity for speakers and further open the range of communication and understanding between blacks and whites by presenting the Negro as a human.

As stated by Kenneth Hagg, the president of URI, the black students on campus have formed their organization to create an atmosphere of openness and communication between themselves and the other students. This atmosphere can be achieved through URI, and students and making them think. As a result, the students of URI recognize their ideas and a conversation between blacks and whites can begin. When this occurs, they should be able to more fully understand each other and realize the gaps between themselves.

Two weeks ago, when the Freshmen entered the dorm to take up residence, the coaches of the frosh football basketball players were ushered to the independent domicile on the second floor West, Such isolation exists at St. and MC, and the executives were asked and the questions were asked.

The plan to keep the ball players isolated was inaugurated by Coach John Harkin with the cooperation of the Residence Director Hem Buerschen. It is an experi-

ment to see if this isolation will stick, and basically, it is to acquaint these "kids" with athletics and to offer them the best academic environment pos-

sible.

Coach Harkin was eager for me to try his program. "My sole in-
tention of this program is to provide羁体 for our varsity program. We have worked too hard, driven too many miles, and spent too much of our limited supply of time; we must win!

This is the time to have our kids become academically in-

tention of this program is to
