The following plans were announced today for 1973 summer housing at Marian College. As in previous years, there will be workrooms, band camps, institutes and other groups on campus this summer whose participants will be living in College housing, in addition to the student sisters, who live on campus each summer.

Students currently enrolled at Marian may live in College housing this summer if one of the following criteria are met (the College housing policy does not apply to summer school students):

1. You will be enrolled in summer school.
2. You are pre-registered for the fall 1973 semester.

What can I expect when I get on campus?

The three speakers on the Feb. 13 show will be Lou Fontaine, director of admissions and financial aid, DePaul University; Dave Huffman, director of admissions, Indiana Central College; Dennis Cole, coordinator of admissions and special academic programs, Anderson College.

On the second show Feb. 20, will be Stephen Griscom, director of admissions, Wabash College; Ed Teets, dean of admissions and financial aid, Franklin College; Gary Yohler, director of admissions, Marian College.

Senator Birch Bayh will be here on campus next Monday, February 19, at 11:30 a.m. to talk to students.

Presently in his second term in the United States Senate, Sen. Birch Bayh was born and raised on a farm near Terre Haute. He graduated from Purdue University with an agricultural degree and farmed for three years until he began his political career in the Indiana House of Representatives at the age of 26. Bayh served two terms as minority leader in the state legislature and was elected to the United States Senate in 1956. During these years, he also attended evening school and graduated from Indiana University in 1960.

In 1962, he won an upset election in the U.S. Senate when he defeated 18-year incumbent Senator Homer C. Hatfield. He was re-elected in 1968 defeating Republican candidate William Ruckelshaus, and was nominated by the largest vote margin the president ever achieved in the state of the Union.

Bayh also served in the U.S. Marine Corps prior to entering political life and has served as a member of the Senate Appropriations Committees.

Day Care Center offered

In an attempt to provide a service to our married student population, in particular, our married female enrollment at Marian College, a drop-in Day Care Center is being initiated at Marian.

This service would provide for the mother student an opportunity to bring her child or children to the campus with her knowledge of both time and money necessary for an "at home baby-sitter." Care at the Day Center would be more likely based on interest motivation rather than job motivation. Care could be staffed by education majors, work-study students with an interest in child care, or by interested volunteers.

The second purpose which such a center could serve is to make the college somewhat more attractive to the women in the local community. It could be of service to the woman who married soon after high school graduation and did not have the opportunity to continue her education but wishes to now.

The presence of the resident halls. Phone service in the White House will be at the discretion of the residents. If a phone is desired, it must be acquired from the phone company and be the residents directly to the Telephone Company charges -bom $15.00 installation and $8.40 per month.

All residents must have a $10 damage deposit on file with the Business Office. Current residents have such a deposit on file.

It will be necessary, during the month of August, to have residents change rooms because of the necessity of preparing for the opening of the fall semester.

All payments are due in advance. Each student will be discussed with the Controller.

Registrations for summer housing will be made with the Office of Student Services.

**Plants announced for '73 summer housing**

**Teleconference to host Marian Feb. 13**

Gary Yohler, director of Admissions, will be representing Marian along with five other colleges in "The College Choice" Teleconference Program to be aired Feb. 13 and 20, on WISH-TV, Channel 8 at 10:30 p.m.

The speakers will answer questions called in by the viewers on such subjects as:

- Is college for me?
- How do I decide which college to choose?
- How do I prepare to be admitted?
- What are normal admission requirements?
- How can I get financial aid?

**Wetland project shows potential**

by Rich Vories

The balance between nature's natural planning and man's intervention is the job of the Minnesota Environmental Foundation. Working with the 22-acre site, the foundation was hired to develop the site for an outdoor laboratory which will benefit the surrounding community.

Carl E. Vogt, coordinator for the foundation, stated at the beginning of the project that if the project is to be a success, trails must be built to allow access to Marion's abundant wildlife and foliage. Vogt stresses that too much contact with the outside world, however, on the part of MAN, could have adverse effects.

The site is located around the area near Lake Marian illustrates the fact that a 22-acre site's topography is quite diverse. Included in the area is a stream, an area of marshland, a large area of abundant farmland, open land, lowlands, and assorted wildlife. From this great variety of land, a balance of wildflowers, grass, development, and wildlife would develop the area the have been expressed by Vogt. Some possible possibilities might include photography, nature trail walking, observation of birds, preservation of the natural area, refuge for ducks and geese, education programs for adults and children, and an independent study site for students.

Director Vogt visited the area last week during the two-day program to attract public interest. Mr. Sam Bernhard, DePaul's Chairman in Biology, expressed her delight over the success of the workshop. Hopefully, the workshop was only the beginning of a project which could provide Marion County with one of the most unique wetland areas of its kind.
Who knows? Maybe in ten years there won’t be a Valentine’s Day.

Maybe by then the only growing permitted or possible will be that of wheat and rice and potatoes. And they’d probably be rationed. You can’t eat a dozen red roses, so why grow them? They only take up space anyway. Besides you have to keep changing the water and water must be conserved.

And what about candy? Well, that’s bad for your teeth. And think of the calories! Anyway cacao beans aren’t on the plants—you can grow them! And would you want to call anybody to get those cards before they go out of style. Tell your lover you care before even love becomes something.

The Home Economics Club is sponsoring a bake sale Wednesday, Feb. 14, in the Perc. and in front of the cafeteria.

The sale will be held from 10:30 a.m. to 1:00 p.m. Everything will be made by the club members.

by Eddie Krusa

The day the letter came out, our personal plea goes out for a simple but necessary thing. Students so why can’t we expect just a little more? Who keep saying that hearts are O.T. shaped as if there were any. How can anyone face the day that the letter came out? Our personal plea goes out for a simple but necessary thing.

And if anybody had any sense, they’d send the money they’d spend for valentines to the Heart Fund.

So you’d better get on it before it’s too late! Send those flowers before they run out. Get those cards before they go out of style. Tell your lover you care before even love becomes something.

But what better reason could there be to wish somebody a happy Valentine’s besides the fact that you want to — since neither rain, nor sleet, nor lack of paper or candy, can ever stop the delivery of love.

by Agnes Bacala

How now Mr. Clean?

A week after a letter in the CARBON, my personal plea goes out for a simple but necessary part of life, cleanliness.

The Johns around this place are worse than anyone might conceive. The problem goes to the man in charge. He passes the buck down the line. The day the letter came out, our industrious “Flash” Gordon was seen hawking out poor old Sy who only does what he is told. Is the school so financially bad off that they have to use the same brush to clean both the urinals and the sinks? How can anyone face something like that?

Marian College expects so much from their students so why can’t we expect just a little from Marian College?

by Eddie Krusa
Valentine's Day, background

by Kathy Giesting

Heni Amiel understood what was going on when he said:

Life is short and we have not too much time for gladdening the hearts of those who are trudging the dark way with us. Oh, be swift to love! Make haste to be kind.

Tomorrow is a special day. A holiday. It has been observed since at least the fourteenth century and probably much earlier. Observances took place. Traditionally, it is observed by the sending of those missives that say in essence "I'm alive and I'm glad you are too."

This essence has taken many forms—from the sonnets of Shakespeare to the latest valentine cards containing such immortal verse as:

Valentines are red
Skies are blue
Kites are fun
And so are you! JMR

But how do we account for this day when 'tis not yet spring when lovers' fancies have always turned to thoughts of love?

Some authorities claim that the holiday is derived from a February feast the Romans used to hold. They called it Lupercalia and all the young Romans put the names of young maidens in a hat and drew names for partners. It was anybody's guess who you'd end up with as a companion at the festival. With a matching system like this, you can understand why the Romans didn't last as long as they might have.

Of course, everyone's heard of the birds and the bees. The bees don't have too much to say about this day but some authorities say its celebration goes back to the rural tradition about this time of year being the time for the birds to choose mates. Even Chaucer seems to have heard of this explanation. His "Paradise of Fowles" is about a group of birds who meet on Valentine's Day to choose their mates for...
Knights best Norsemen for redeeming victory

The final score was 99-87 in favor of Marian but the game wasn't actually that close.

Marian's never-never-die Knight's still in the running for a coveted playoff berth, rode a combination of hot shooting and fancy passing to a 12-point victory over the 9-4 Norseman that sailed from in Northern Kentucky State looking for a victory.

Docking at Reynolds Fieldhouse, the Kentuckians found themselves down 11 points by a team hungry for victory that just weren't to be denied.

Urged on by a nearly capacity crowd, Coach Ed Schilling men buried the nets at an over 60% clip, with five of them finishing in double digits. Bill Smith led the way with 24, Joe Wade contributed 19, Jim Apted added 17; freshman Brian Wallace and John Springman 10.

Apt and Wade grabbed 12 rebounds each, with Smith adding 10.

John Springman, having one of the best games of his career dished out a school record 15 assists and wowed the crowd with his adept ball handling. His performance came on the heels of what was probably his lowest scoring year as they were soundly thrashed by an exceptionally good Wright State crew, 91-68, at Ohio on Wednesday.

Bill Smith, all American can- didate, but for a big man it wasn't enough as the Knights fell hard.

Joe Wade and Greg Pawlik yanked off eight carom apiece to lead that department for the Schilling-coached blue and gold.

The Knights play at home for the last time this season on Wednesday night, with down state rival Rose-Hulman provid- ing the opposition.

This game will mark the last appearance at Reynolds' Field- house for several senior members of the team who have been proud to wear the blue and gold for the past few years.

These Harriers provided the nucleus for the recent resurrected College basket- ball and have provided many thrills for their followers, so it would be appropriate if everyone would turn out and show them you appreciate their efforts.

Bill Smith, Marian's only Bas- ketball All-American, John Springman, and Greg Pawlik will see their last home action. Be there to support them.

Chris Everett scores 2 of his 21 points as Joe Rea unsuccessfully attempts to stuff him in the intramural game between the Social Pros and the Birdmen.

U.W.I. holds unchallenged last place

In the big battle of the two worst teams in the league, White Lightning led by a cast of heroes defeated a listless U.W.I. led by a cast of goats, 50-31.

Jay Farrell in a rare appearance was the difference in the game, but Dan "Hobbit" Ryan's 4-4 field percentage sparked Moose's Mighties to an easy victory. Farrel had 12 points, Porcel had 11. Cebulko followed with 9 solid marks, and even Dan Kernan with 6-6 free throw attempts sparked. Moose Moose added insult to injury with 4 points. "Toad" Hornbach with his greatgobbling ability and 8 solid points was the only standout for U.W.I.

Two extremely cold teams battled and Oedipus Complex came out on top of Mourning After 28-10.

Mourning After, trying to prove that they are not "Scuderry Players," were poor on offense as was Oedipus, but much weaker on defense. Steve "Percentage- shot" Hammerle was high man for the winners, while Mike Bazely was the closest member of Mourning After to reach double figures with 9 points.

Mike Hall, with 26 points led Wan-Tu-Warri over MFJIC in a very physical contest 58-50. In a game marked by numerous fouls and arguments, Rick Martin fired 18 points. Randy Washington with a strong second half finished the day with 21 points to pace his scoring drive. Great hustle was displayed by both teams with Mike Morse as he has showed several times this season.

In a great upset and surprise, the Daughters of Shaft had a much easier time trouncing the Ball Bouncers.

"Scuderry Player of the Week" were the determining factors. Few 11-0 offensively league leaders and Oedipus Complex 11-0, and defense league leader.

Scuderry Players were poor on defense, with the exception of Ken Hornbach who have been unanimously cho- sen. Their lack of hustle, poor spirit, and false desire in their game against White Lightning were the determining factors. They were only 1 point under- dogs, but poor defense and hor- rible offense allowed them to be defeated by 19 points.

Steve Padgett and the Courty Few received their first real scar of the season, but still defeated the Golden Nails 56-40 with an offensive output way below their season average. Coach Jim Apted had his squad ready and led throughout the game until 2 minutes remained with the score tied 39-39. Then Courty Few reeled off 16 points while Golden Nails managed only one and ice re- bounder, Dan Bauer, fouled out. This sets up an exciting match between two undefeated powerhouses next Saturday at 6:00 p.m. Courty Few 11-0, offense league leaders and Oedipus Complex 11-0, and defense league leader.

"Scuderry Player of the Week" for the week is the whole U.W.I. with the exception of Ken Hornbach who have been unanimously cho- sen. Their lack of hustle, poor spirit, and false desire in their game against White Lightning were the determining factors. They were only 1 point under- dogs, but poor defense and hor- rible offense allowed them to be defeated by 19 points.
