TO THE CARBON EDITORS:

I am writing in reference to the letter supporting a reduction in taxes. It is good that we concern ourselves with this. The first thing that comes to mind when we speak of reducing taxes is that we will have a little more pocket money. But we must look further than this alleviation. The programs that will be hurt by the reduction of taxes are the same programs that give aid to those who are not as fortunate. Should they suffer because we don’t want to give up a little money from our paychecks? It is frustrating to think of the high percentage of the tax dollar that goes to military spending. It is even more frustrating to think that a reduction in taxes would most probably hurt the programs that we need (Welfare) because the capitalististic structure of our society does not allow for equal distribution of goods and services. No, a reduction in taxes is not good. It is not good unless it also means a reduction in military spending.

HUMAN RIGHTS IN LATIN AMERICA

ATTENTION SWIMMERS AND ALL INTERESTED MEMBERS OF THE MARIAN COMMUNITY:

The Freshmen Class has been doing some renovation at the pool in Allison Mansion and would like any individuals who have some great ideas and any amount of free time, whether it be an hour or just half an hour, to come and help them out on Monday thru Thursday, 7-9pm. As soon as the chlorination is done, there will be swimming after each work session for all those who helped out. Upon total completion of the pool, there will be a POOL PARTY for the entire Marian College Community. The more interested individuals we get to help at the pool, the sooner we will be able to enjoy the pool for our use. For further information, contact Bonnie Culley at ext. 465 or pres. Susan Back at ext. 445. Please donate any amount of time you can.

P.S. The freshmen class should be commended for this effort. All the classes should follow their example and take on a project to help maintain the campus’ original beauty.

Mrs. Osborne

TO MARIAN COLLEG E STUDENTS:

Last spring I applied for a job at Marian College that always had a controversial stigma attached to it. When I applied, I accepted that fact as part of the job, hoping in the coming year that that stigma would fade. Somehow with the passing of time it hasn't faded, but instead it has prospered. I started in August with really optimistic hopes for the coming year. The staff was involved in all areas of Marian College, and they were liked by both students and administrators. Looking now at where I stand, I've had many regrets that I ever accepted that position at all. I'm stuck in the middle of the ever widening gap between students and administrators, hoping something will happen to bring things to normal again. I guess it is wrong for me to hope for this.

I never look for problems, they seem to fall in my lap, and then being put in that position I must act in my best judgment. My judgement is never right to anyone else but myself. Is it wrong for me to just want to be a student for a change and not have to face those discipline problems of others?

My answer is clear to me now, even though I see myself as a student, others will always see me and label me the Resident Assistant!
